Product obsolescence communication

To provide our associates with more information on Flowserve products, we are communicating the obsolescence plan of some of our PMV branded products.

No longer in production:

- WS/WM with a resin housing, code "RR"
- P1540 Anti vibration
- P1700 series
- P3/EP3 series
- Old D20 series, both General purpose & Intrinsically safe
- P4 series; KP4, APEX 4000
- EP5FS fail safe option

PMV product line can fully support the above obsolescence plan with alternative products meeting all market requirements.

- WS/WM resin market can be fully covered by **PS/PM devices**
- P1700 market can be covered by **P1500 series or P5 Tuftram coated**
- P3, please contact your PMV representative for correct product selection
- EP3 market can be covered by **D20 positioner**
- P4 market can be covered by **P5**
- EP5FS market can be covered by **D3 w/fail freeze option**
- Old D20 market can be fully covered by **New D20 and D30 devices**

Flowserve will continue to provide support on all PMV products as part of this obsolescence plan, to ensure a smooth transition to new devices.

Contact your Flowserve sales representative for any requests or if you need additional information.
